

Julie M. Weber

I attended Kent State University in Ohio. I have a Bachelor's in Science with a major in Nutrition Science. I also have a Bachelor's in Mathematics. My Master's is in Education with a focus on Technology.

A nine-month internship at the VA Medical Center in La Jolla brought me to the San Diego area. I was employed by Sharp Hospitals for six years, working primarily in the SICU, MICU, stroke rehab, and cardiac units.

Ultimately, my love for mathematics and my desire to start a family led to my shift to a career in education. Helix Charter High School has proved to be a wonderful place to spend the last fourteen years as a mathematics teacher. I currently teach Algebra 2 and AP Calculus.
